

From a decision-tree path to a probabilistic planning rule

stack9: objtype0 below, objtype2 above, relation0 | leaf 22

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype1 = NO
- 3. above_is_objtype1 = NO
- 4. above_is_objtype2 = YES
- 5. below_is_objtype3 = NO
- 6. relation_is_relation0 = YES

Readable rule

WHEN
below = object symbol 0
above = object symbol 2
relation = symbol 0
action = stack

Leaf outcome distribution

PREDICT
62.0% roll1
24.0% tumble1
10.0% tumble2
4.0% inserted

stack8: objtype0 below, objtype2 above, relation1 | leaf 21

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype1 = NO
- 3. above_is_objtype1 = NO
- 4. above_is_objtype2 = YES
- 5. below_is_objtype3 = NO
- 6. relation_is_relation0 = NO

Readable rule

WHEN
below = object symbol 0
above = object symbol 2
relation = symbol 1
action = stack

Leaf outcome distribution

PREDICT
65.3% roll1
22.7% tumble1
10.0% tumble2
1.3% inserted
0.7% roll2
