

From a decision-tree path to a probabilistic planning rule

stack3: objtype1 below, objtype3 above, relation0 | leaf 11

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype0 = NO
- 3. above_is_objtype0 = NO
- 4. above_is_objtype2 = NO
- 5. relation_is_relation1 = NO
- 6. above_is_objtype3 = YES
- 7. below_is_objtype1 = YES

Readable rule

WHEN
below = object symbol 1
above = object symbol 3
relation = symbol 0
action = stack

Leaf outcome distribution

PREDICT
74.6% tumble2
23.8% tumble1
1.6% roll1

stack4: objtype1 below, objtype3 above, relation1 | leaf 14

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype0 = NO
- 3. above_is_objtype0 = NO
- 4. above_is_objtype2 = NO
- 5. relation_is_relation1 = YES
- 6. above_is_objtype1 = NO
- 7. below_is_objtype3 = NO

Readable rule

WHEN
below = object symbol 1
above = object symbol 3
relation = symbol 1
action = stack

Leaf outcome distribution

PREDICT
69.4% tumble1
30.6% tumble2
