

From a decision-tree path to a probabilistic planning rule

stack16: objtype0 below, objtype2 above, relation0 | leaf 37

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype0 = YES
- 3. above_is_objtype3 = NO
- 4. relation_is_relation1 = NO
- 5. above_is_objtype0 = NO
- 6. above_is_objtype1 = NO

Readable rule

WHEN
below = object symbol 0
above = object symbol 2
relation = symbol 0
action = stack

Leaf outcome distribution

PREDICT
69.0% inserted
20.7% stacked
10.3% tumble2

stack20: objtype0 below, objtype2 above, relation1 | leaf 43

Exact decision path

- 1. below_is_objtype2 = NO
- 2. below_is_objtype0 = YES
- 3. above_is_objtype3 = NO
- 4. relation_is_relation1 = YES
- 5. above_is_objtype0 = NO
- 6. above_is_objtype2 = YES

Readable rule

WHEN
below = object symbol 0
above = object symbol 2
relation = symbol 1
action = stack

Leaf outcome distribution

PREDICT
97.9% stacked
2.1% tumble2
